About me

Senior Frontend Developer with 6+ years of experience building high-performance eCommerce solutions, specializing in Shopify Liquid theme development and Shopify Hydrogen storefronts. I deliver pixel-perfect Figma-to-Liquid conversions, custom theme functionalities, and performance-optimized stores. Experienced in leading development teams, architecting scalable solutions, and integrating advanced analytics through GTM.

Experience

Senior Shopify Developer
2023 - 2025

Fosil.io

Designing and developing custom Shopify Liquid storefronts for premium brands with mobile-first, performance-optimized architecture. Built seasonal discount systems, collection filters, and advanced checkout flows. Improved page load times by 40% via Liquid and asset optimizations.
Tech Stack: Shopify, Shopify Liquid, React, Typescript, Javascript, GraphQL

Senior Shopify Developer
2023 - 2024

Machinarium

Led development of Shopify Hydrogen storefronts (400K+ users) and React Native apps (100K+ users). Built custom Shopify apps saving costs, integrated GraphQL Storefront API, and delivered B2B and internal communication platforms.
Tech Stack: React, React Native, Remix, NextJS, Vite, Typescript, Javascript, GraphQL, RestAPI, GTM, Shopify, Shopify Hydrogen, Shopify Liquid

Frontend Developer
2021 - 2023

GEOSYS GIS & Consultancy Services

Successfully delivered GIS and Process Management apps (SebAtlas, TKGM), contributing to efficient processes. Enabled real estate data accessibility with the Parcel Inquiry Application, visited by 2.5 million users monthly.
Tech Stack: React, Typescript, Javascript, GraphQL, RestAPI, WebSockets, PrimeReact, OpenLayers, Cesium (3D), Leaflet (2D), Terriajs

Fullstack Developer
2019 - 2021

Digigammon

Developed frontend and backend using MERN Stack, improving UX and integrating with ML. So, we achieved seamless video processing and notified the user when their backgammon transcription was ready.
Tech Stack: React, MongoDB, Express, NodeJS, TailwindCSS

PROJECTS

Upwork
2025–

Rebel Bunny (https://rebelbunny.com/)
Role: Shopify Developer
Developed a high-conversion Shopify Liquid storefront for a premium matcha brand, ensuring a bold, on-brand user experience. Integrated custom product templates, promotional banners, and seamless cart/checkout flows optimized for mobile and desktop.
Tech Stack: React, Shopify Hydrogen, Typescript, Javascript, GraphQL, Remix

Fosil.io
2025–Waiting For Domain

Sara Hatun (https://dyusvh-yr.myshopify.com/)
Role: Shopify Developer
Developed a custom Shopify Liquid storefront for a luxury scarf and shawl brand, delivering pixel-perfect, responsive designs. Implemented dynamic product collections, seasonal discount features, and seamless cart/checkout workflows.
Tech Stack: React, PWA, Typescript, Javascript, RestAPI, GTM

Udemy
2024– 2025

Shopify Hydrogen & GraphQL Storefront API Development | 2025 (https://www.udemy.com/course/shopify-hydrogen/)

Role: Developer & Instructor
Created the world's first English-language Shopify Hydrogen course. Developed the demo application, recorded instructional videos, and designed the curriculum.
Tech Stack: React, React Native, Remix, Typescript, Javascript, GraphQL, Shopify, Shopify Hydrogen

Machinarium
2023 - 2024

EVE Shop (https://eveshop.com.tr/) (Mobile + Web)

Role: Lead Developer
Turkey's top cosmetics e-commerce platform. As lead developer, I architected the Shopify Hydrogen (web) and React Native (mobile) apps, mentored the team, and integrated key features.
Tech Stack: React, React Native, Remix, Typescript, Javascript, GraphQL, RestAPI, GTM, Shopify, Shopify Hydrogen

Ak Gıda B2B (Private Project)

Role: Lead Developer & Architect
A B2B sales platform for Ak Gıda (brands like İçim). Spearheaded development, designed the architecture, and guided junior developers in building the system.
Tech Stack: React, NextJS, Typescript, Javascript, RestAPI

Ak Gıda Connect (Mobile)

Role: Lead Developer
A WhatsApp-like internal communication app for Ak Gıda employees. Led development, implemented real-time messaging (Socket.io), and mentored the team.
Tech Stack: React, React Native, Typescript, Javascript, RestAPI, Socket.io
